

YOU SAY YOU WANT SOME EVOLUTION

Since its introduction 12 years ago, Evolution has evolved into something of a phenomenon. Its fan base gives new meaning to the word loyal and is spread all over North America and Europe. We hear from them on a daily basis and let's just say they really, really enjoy this wine. We've got to admit, we knew we had something special when we intentionally/luckily came up with this blend, but, wow, with all this success, we're blown away.

BLEND

Evolution's off-dry, somewhat tropical wine with a crisp finish is like no other blend or single varietal wine. We carefully merge Pinot Gris, Müller-Thurgau, White Riesling, Semillon, Muscat Canelli, Gewürztraminer, Pinot Blanc, Chardonnay, and Sylvaner. For those keeping score, that's nine different varietals which add up to a flavor greater than the sum of its parts.

PAIRINGS

Evolution goes perfectly with a hot summer day. But, over the years, we've heard that some folks enjoy it on warm spring days, crisp autumn evenings and cold winter nights. They say it reminds them of those hot summer days. As far as food, Evolution pairs well with anything found in a Mexican, Caribbean or Asian cookbook. It likes bold flavors and spice.
