APPROXIMATE LIFESPAN IN A PROPER CELLAR: 5-7 years

NUMBER OF CASES PRODUCED: 14,740 cases

SUGGESTED RETAIL: \$15

WINEMAKING NOTES:

For years, fans of our Evolution Lucky No. 9 White had been clamoring for us to blend its red companion. Actually, clamoring is putting it nicely. Evolution takes time. So when the time was right and a wine had evolved which would stand apart from the cluster of existing red blends, we pounced.

Our goal with this red blend is to make it like its companion - appear effortless, easy-to-drink and food-friendly but in reality be quite complex. This makes it fun. Fun to blend and fun to drink! This is a big red blend using a couple of traditional Italian varietals and one traditional French varietal. Also, like the French Rhône's we add a splash of white wine, just a small percentage of our Evolution Lucky No. 9 White, to bring in another layer of complexity that lifts the aromatics, color and flavor. All these aspects together showcase the evolution from old world wines to new world wines. Cheers!

TASTING NOTES:

Evolution Big Time Red is a big bold red, with the components that you've come to love in this blend - Sangiovese, Nero d'Avola, Syrah, Montepulciano, and just a touch of Evolution Lucky No. 9 White; we've also recently added the red grape of Sicily: Nero d'Avola. This addition adds more fruit to the blend to create a softer, rounder, fruitier flavor profile. This wine is structured and rich with flavors of cherry and plum pie filling, black cherry and red currants and hints of savory notes throughout the palate.
